

GLOSSARY

ALS	Advanced Life Support
AIM	Alternative Investment Market
Ta ₂ O ₅	Tantalum pent-oxide
kg	kilogramme
klb	thousand pounds
km	kilometre
lb	pound
m	metre
Mt	million tonnes
pa	per annum
ppm	parts per million
\$	US Dollar, legal currency of the United States of America
£	Pound Sterling, legal currency of the United Kingdom

Indicated resource that part of a Mineral Resource for which tonnage, densities, shape, physical characteristics, grade and mineral content can be estimated with a reasonable level of confidence. It is based on exploration, sampling and testing information gathered through appropriate techniques from locations such as outcrops, trenches, pits, working and drill holes. The locations are too widely or inappropriately spaced to confirm geological and/or grade continuity but are spaced closely enough for continuity to be assumed.

Inferred resource that part of a Mineral Resources for which tonnage, grade and mineral content can be estimated with a low level of confidence. It is inferred from geological evidence and assumed but not verified geological and/or grade continuity. It is based on information gathered through appropriate techniques from locations such as outcrops, trenches, pits, working and drill holes which may be limited or of uncertain quality and reliability.

Mineral resource a concentration [or occurrence] of material of economic interest in or on the Earth's crust in such form, quality and quantity that there are reasonable and realistic prospects for eventual economic extraction. The location, quantity, grade, continuity and other geological characteristics of a Mineral Resources are known, estimated from specific geological evidence and knowledge, or interpreted from a well constrained and portrayed geological model. Mineral Resources are subdivided in order of increasing confidence, in respect of geoscientific evidence, into Inferred, Indicated and Measured categories.
